

Civil/Environmental Engineer

Environmental Resolutions, Inc. (ERI) is a leading engineering, planning, environmental, and surveying consulting firm that has been providing professional services to our clients since 1990.

ERI has an opening for a degreed Civil/Environmental Engineer who seeks to become an active employee in an energetic, well-established company. This position includes responsibility for the planning, design, and construction engineering of municipal infrastructure including stormwater and utilities (water & sewer), in addition to various site-development and municipal projects for both municipal and private clients.

This is an excellent opportunity for a qualified candidate to work in a dynamic and thriving work environment. ERI provides a competitive salary, generous benefits package including medical, dental, an employer-funded Health Reimbursement Account (HRA), 401k options with company match, flexible work environment, and tuition and professional development reimbursement.

RESPONSIBILITIES AND DUTIES:

- Perform field investigations and surveys.
- Responsible for project development and various tasks associated with roadway, stormwater, sanitary sewer, potable water, and recreation projects.
- Oversee and complete assigned projects.
- Assist with the preparation of proposals.
- Prepare design plans and specifications.
- Assist in Construction Project Administration.
- Perform Planning/Zoning Board reviews of private development projects.
- Prepare design calculations and gather and compile data.
- Facilitate and maintain open communication with project team members, clients, and contractors.
- Prepare hydrologic and hydraulic design and calculations for various site development and infrastructure projects.
- Perform hydrologic and hydraulic modeling for lake and dam projects.
- Perform hydrologic and hydraulic calculations and stream modeling for bridge/culvert design.

QUALIFICATIONS:

- Must have EIT certification; PE license a plus.
- BS in Civil Engineering.
- Familiarity with hydraulic or hydrologic modeling software.
- Must have Stormwater Management/H&H Background.
- Familiarity with Planning and Zoning Board Reviews.
- Ideally 7-10 years of work experience in Site/Civil Design, but we are willing to interview "qualified" candidates with less years of experience.
- Excellent written and oral communication skills.
- Excellent time management and organizational skills.
- Must have a valid Driver's License.
- CADD Experience preferred but not required.
